First Fabyan Well Shoots Oil Again

AFTER FOUR YEARS REST THE MYSTERY WELL
STILL SHOWS UP BIG.

Thursday afternoon of last week, after nearly four years rest the famous Fabyan well was opened long enough to throw a large quantity of oil over the hillside south east of the well. While the valve was open the roar of escaping gas and oil could be heard for several miles and a spray of oil and sand was thrown as far as the Fabyan school which must be three quarters of a mile from the well. This well that was the cause of the early drilling in the Wainwright field made several spectacular plays in the early days of development in the east end of the Irma field. Since its completion it has got beyond control several times when the country side was covered with oil and sand killing all of the trees and vegetation for some distance from the site of the well and at times making the road some distance away impassable on account of the heavy coating of oil blown on it. The well which was originally drilled by the Imperial Oil Co., for the Grattan Oil Co., pioneers in the Irma-Fabyan-Wainwright fields and who own several thousand acres of choice leases between Fabyan and Irma. At the time the well was drilled the Imperial had an agreement with the Grattan Oil Co. to develop their leases on a royalty basis but for some reason the agreement was cancelled and the Grattan Oil Co. who still own the leases have since arranged with the Fabyan Petroleum to do further drilling on a royalty basis. A pipe line is being laid from this well to the site of the Fabyan Petroleum well about a mile west of this location and as soon as this line is connected to the boilers it is expected that drilling will be resumed at the latter well.

Preparations are being made for the drilling of several new wells between Irma and Wainwright and the coming summer will no doubt see more real development than any season in the past.

Letter to the Editor.

March, 27th, 1929

Editor,
The Times,
Irma, Alberta

Sir:—The reverend gentleman who has written about Christian Science in your columns has made a number of incorrect and misleading statements, a few of which I desire to correct. He writes, "Christian Science is in its textbook treats only with the books of Genesis and Revelation, together with such texts as are conveniently suitable." It is true that in the Christian Science textbook, "Science and Health with Key to the Scriptures," Mrs. Eddy explains portions of those two books, Genesis and Revelation. By so doing, she gives the key to the spiritual meaning of the Scriptures. Through studying the Christian Science textbook, Christian Scientists are gaining a deeper love for the Bible, and a stronger, more intelligent desire than they had before, to practice what the Bible teaches. Christian Scientists study the entire Bible diligently.

Christian Science does not teach that Mrs. Eddy is "the successor of Christ Jesus," as this critic asserts. Mrs. Eddy never claimed to be the successor of Christ Jesus, and Christian Scientists do not so regard her. They regard her as the Discoverer and Founder of Christian Science; and they are grateful because, through her great work, the vital healing work which Christ Jesus did has been restored. This far-reaching fact may offend some of our clerical friends, but it cannot be intelligently denied or refuted.

The critic might have saved himself from some mistakes if he had gained a correct sense of the schemes of Christian Science in regard to Christ Jesus. Referring to Christ Jesus' work, Mrs. Eddy writes in "Science and Health" (p. 18): "Jesus of Nazareth taught and demonstrated man's oneness with the Father, and for this we owe him endless homage. His mission was both individual and collective. He did life's work aright, not only in justice to himself, but in mercy to mortals,—to show them how to do theirs, but not to do it for them nor to relieve them of a single responsibility."

Christian Science teaches that God is Person, in the sense of Infinite Personality, or divine Principle, but not in the lower sense. God is not a magnified human being.

Following the example of Christ Jesus, Christian Science denies the reality of evil. Speaking of evil, or

devil, Jesus said, "There is no truth in him. When he speaketh a lie, he speaketh of his own; for he is a liar, and the father of it." (John 8:44). Christian Science is in complete accord with this teaching of Christ Jesus that evil is not real or true. Like the Master, Christian Scientists do not ignore evil. They strive to overcome it with good.

The unprejudiced study of Science and Health is today healing people of seemingly hopeless disease as well as of sin. Those who with unbiased thought study this textbook in conjunction with the Bible, find that Christian Science teaches the truth about God and man and solves the problem of human existence.

Peter B. Biggins,
Christian Science Committee on Publication.

SAFETY FIRST

PLAY, APRIL 15th

The play "Safety First" which was postponed on account of Gordon Fenton's accident will be put on next Friday evening, April 12th, in Kiefer's Theatre, Irma, beginning at 8:30 sharp. The play is represented under the auspices of the Irma Ladies Aid. It is of a clever comedy type, brilliant throughout, and well worth seeing.

The cast of characters are as follows:
Jack Montgomery, Mr. Sigurd Johnson.
Jerry Arnold, his pal, Mr. Gordon Fenton.

Elmer Flannel, Jack's cousin, Mr. Rogers Wright.
Detective McNutt, Rev. M. L. Wright.
Abou Ben Mocha, Turk, Mr. L. A. Schon.
Mabel Montgomery, Jack's wife, Mrs. E. H. Simmons.
Virginia Bridges, engaged to Jerry, Miss M. G. Magrath.
Mrs. Barrington-Bridger, Mrs. A. H. Locke.
Mary Ann O'Finnerty, Mrs. S. Johnson.
Zuleika, daughter of Abou, Mrs. J. W. Jack.
Coach, Mrs. E. L. Elford.
Admission: Adults 50c, Children 25c.

Mr. Lloyd Renwick returned to Three Hills Monday after spending the winter with his parents in the Alma Mater district. Lloyd has a position with the Imperial Oil Co., driving a truck at Three Hills.

CHURCH NOTICES AND ACTIVITIES

CHURCH NEWS

Large congregations greeted the pastor on Easter Sunday. At the morning service at Irma fifteen signed the decision cards. Two children were baptised, viz. Eleanor Olive Jack and Garth Wilson Johnson. The evening service was enlivened by special music by the choir and was followed by the Holy Sacrament.

The schoolhouse at Alma Mater was beautifully decorated for the service by Mrs. W. Renwick and the seating capacity was taxed to the utmost. Mr. Harry Carter presided at the organ, Miss Violet Renwick sang a solo the Misses Annetta McMillan and Molly Burton, a duet, and Easter recitations were given by Master Philip Inken and the Misses Grace and Angelina Jones. Morris and Orville Wright assisted in the Easter music with their violins.

Services Sunday, April 7th
Alma Mater — 2 P.M.
Roseberry — 3:30 P.M.
Irma — 7:30 P.M.

Because of the appreciation shown by the people the pastor hopes to secure some special music for Alma Mater at each service.

The Ladies Aid meet at the home of Mrs. J. S. Reeds Thursday April 11th and the Woman's Missionary at the home of Mrs. Frickleton on Thursday, April 11th.

Financial Statement

The following names were omitted from the Financial Statement of the United Church:
M. D. McLeod \$15.00
Wm. Steele 5.00
J. Coles 2.50
J. H. Archibald 5.00
C. T. Hill 25.00

W. M. S. NOTES

A Special Easter meeting of the W. M. S. was held at the home of Mrs. James Fenton, on Easter Monday, April 1st. With 12 members and 10 visitors present. After the regular opening exercise, Mrs. Locke gave a temperance reading, and Mrs. Wright and Mr. Gordon Fenton, gave a duet "In This One Day", accompanied by Mrs. Sellers of Edmonton on the organ. Easter offering was taken up and amounted to \$35.00.

The last regular meeting of the W. M. S. was held at the home of Mrs. Elford on Monday even'g, March 25th. Next meeting will be with Mrs. Frickleton on April 18th.

NEWS ITEMS FROM KINSELLA

Mr. E. C. Williams motored to Edmonton last week, Mr. Dobry accompanying him. They reported the roads very good, but rough in places.

Mr. J. F. Murray spent a day in Edmonton last week.

Mr. Cooper shipped a car load of cattle from here on Monday.

Miss Belle Arkinstall and brother of Edmonton spent Easter with their parents Mr. and Mrs. Arkinstall.

Miss Isabel Stronach and brother Jack are spending the Easter holidays with their parents Mr. and Mrs. J. Stronach.

Mr. Jack Corbett who is attending school in Edmonton is spending the holidays with his parents Mr. and Mrs. D. Corbett.

Mrs. D. Corbett and brother, Mr. Arthur Lardson who have been spending the past three months in Ontario, returned home Wednesday evening last.

Mr. Jimmie Walker who was injured last week when the team ran away with him, is getting along nicely at the home of Mr. and Mrs. William Anderson. His brother, Mr. Willie Walker and wife of Roseberry visited him on Wednesday.

Miss Larue, teacher in the public school here spent Easter with her sister at Stettler.

Mr. Sullivan, High School teacher here, spent Easter in Edmonton.

Mrs. Hawkesworth, Mr. Bishop and son Claude of Vermilion spent Easter with the latter's daughter, Mrs. J. Neale.

Miss Minnie Ross and brother George of Viking spent Easter here with their grandparents, Mr. and Mrs. Lund.

Miss Bessie Scott is spending the week in Edmonton.

Mr. McKie is spending some time in Edmonton.

The Ladies Aid are planning on putting on a play sometime soon. Watch for the date.

Mr. Gordon Grier of Portage, Man., is visiting his sister Mrs. William Anderson.

Mr. Harold Williamson of Irma has commenced work for the Jamieson Construction Co. here.

Mr. William Rees and family have moved onto a farm about two miles east of town. Mr. and Mrs. Anderson are preparing to move into the rooms vacated by Mr. Rees over Mr. E. C. Williams's office.

Mr. L. O'Leary has returned home after visiting his brothers in Winnipeg. He reports Winnipeg a live town. His brothers are retired farmers.

Mr. J. G. Dobry has purchased a new John Deere tractor from E. C. Williams. He is having it brought out to his farm today.

A large attendance was on hand at the local talent play held in the Lake Vernon Schoolhouse on Friday last, March 28th.

In spite of the fact that the players only had a short time to prepare themselves, the play was one of the best seen in the district for some time. About \$35.00 was realized, part of which is to go towards buying games, etc. for the school. A dance after the play, concluded the evening.

Mr. Olaf Overbo has left for Edmonton for medical attention.

Mr. J. F. Murray has sold out his General Store business at Kinsella to Mr. Ferries of Bentley, Alta. The new owners come well recommended, and no doubt will make many friends in their new location. Mr. Murray and family are old timers here, having been twice in business at Kinsella. They are at present going to reside in town. Stock was being taken yesterday and today, and the store will open under new management tomorrow. Word has been received that Mr. Lunty Beschell has undergone a serious operation at Edmonton. Lunty was formerly a resident of this district until about two years ago when he and his wife moved to Kinsella, where they have been farming.

Mr. James Walker of Irma and at present employed by Mr. William Anderson at Kinsella, met with a painful accident on Tuesday morning. The team he was driving got away and in some way the unfortunate man was thrown off from the wagon. He received a large gash in the head and a badly bruised ankle. He was found immediately after by Mr. Wm. An-

PRUDHOLME WINS FROM CURLY KID AT WAINWRIGHT WEDNESDAY EVENING

Prudholme, of Grouard, defeated Curly Kid, of Irma, in a hard slugging ten round bout at the Wainwright theatre last Wednesday evening. The bout ended in the eighth round when Curly Kid was counted out. In the seventh round Curly Kid had Prudholme dazed, but was unable to put him out before the round ended. Curly Kid put up a good battle against a more experienced and hardened boxer.

The Renshaw brothers, Tony brothers, Pete Spring, of Irma, and Mike Tank, of Hardisty, and H. Myers and Tovey, of Wainwright, furnished the preliminaries.

The Renshaw boys put up a clever exhibition, and so did Spring and Tank. Myers and Tovey had a slug fest that gave the fans a lot of thrills. The theatre was crowded to capacity to see the bouts.

MARCH REPORT FOR ROSS SCHOOL

Grade VIII.—Raymond Stinson, average 70.50.

Grade VII.—Leela Nash, av. 77.60, Bertram Nicoll 68.50, Clayton Peterson 63.

Grade VI.—Mary Kennedy 72.25, Grade V.—Olive Larson 86.

Grade IV.—Fern Stinson 93, Hazel Nicoll 91.

Grade III.—William Nash 96.28, Albert Larson 91, Ellen Anderson 86, George Mooney 82.28, Allen Anderson 79.60.

Grade II.—Gladys Larson 85.1, Grade I Sr.—Robert Burr, first in class; Rosie Shmiliar, second.

Grade I Jr.—George Archibald, 1st, Billie Shmiliar 2nd, Alex Shmiliar 3rd.

I am starting a beginners class on Monday, April 8th. Would parents kindly try to have all commences on that date. All newcomers for all classes are requested to come that day also.

A. G. Miles, Teacher.

MARCH REPORT OF ALBERT SCHOOL

Grade VIII.—Charles De Tro 72 per cent; Gordon Ramsey 66 1-2, Stanley Jones 56.

Grade VII.—Jessie McBain 56 1-2, Grade VI.—Albert Jones 70, Erling Large 60.

Grade V.—John Barrs 73, Edith Jones 72, Edith McRoberts 69, Harley Barrs 64, Sandy Ambler 62, Ivan Hardy 60, Margaret Ramsey 56.

Grade IV.—Kathleen Barrs 68, Andy McBain 65, Vernon Bjork 64, Grade III.—Edwin Sandersen 77, Wilma Currie 71, Peter Sokulski 63.

Grade II.—Evelyn McRoberts 81, Edna Jones 69, Edgar Jones 62, Sophie Sokulski 60.

Grade I.—Francis Barrs, good; Betty Bain, fairly good.

Bessie H. Scott, Teacher.

Wedding Bells

The marriage of Mr. Harry Lennon and Miss Irene Thorpe, was celebrated by the Rev. Norman Whitmore, pastor of the United Church at Wainwright, on Tuesday afternoon April 2nd. The witnesses were Mr. and Mrs. E. Rae. After the ceremony the happy couple took the train for British Columbia where they expect to make their home.

erson, who brought him to town. Dr. Murray, of Irma, was at once notified, and it was necessary to insert seven stitches to close the wound on the head. Fortunately the doctor believed there was no fractures as near as could be ascertained without an X-ray being taken.

Nurse Conroy is giving a short course in nursing in Lee's Hall at 2:30 p.m. April 8th.

Mr. Frank Thompson and family have purchased the Jones farm east of town. They are at present residing with John and Fred Beschell. They formerly farmed south of Viking.

Mrs. D. Corbett has recently returned from a visit to Ontario.

The many friends of Mr. John Walker will be pleased to know that he is improving, though slowly, from a severe case of rheumatism. Mr. Walker has been in the Royal Alexander hospital at Edmonton for over a month, and is able to walk only with the aid of crutches.

BIG FIRE AT KILLAM EARLY TUESDAY MORNING

Killam was visited by a disastrous fire early Tuesday morning at four o'clock. A Chinese restaurant, pool room, barber shop, jewelry store, ice house, warehouse and the hotel sample room were destroyed. The fire brigade had a difficult time in saving the hotel. The fire is said to have started in the Chinese restaurant.

One Nation, Two Cultures

The Dominion of Canada is a great heritage. It has many great problems to solve in order to achieve its destiny. Before Governments and people can successfully cope with these problems the citizenship of the Dominion must become imbued with, fully accept, and earnestly practice the "Spirit of Confederation" which animated the leaders in the public life of this country sixty odd years ago. The names and memories of the Fathers of Confederation are held in honor, not only for what they achieved, but because of the true patriotism expressed through real sacrifice by which union became an accomplished fact.

It is no light matter to speak of the Spirit of Confederation. It was a very real thing. It breathes through every utterance of the men who found it necessary to sink political differences, submerge personal views and convictions, abandon policies dear to their hearts, and accept compromises failing short of what they desired. But they did it, knowing that only so could disaster for British and Canadian interests be averted and the future of the northern half of the continent under the British flag be assured. It was this spirit which alone made Confederation possible and carried it successfully through the stormy early years.

This same spirit is just as vitally necessary in the life of Canada today as it ever was in the past. Without it the Dominion could not have had its being; without it the Dominion cannot continue to exist.

The great challenge which Canada presents to the world at large, and, of course, most vitally of all to her own people, is not in the material realm of trade and commerce, but in the spirit of the people of the Dominion composed as they are of two great races, two distinct forms of religion, speaking two languages, and the product of two cultures. Canada's challenge to the world is to be found in our success or failure to consistently live up to the Spirit of Confederation and make it a living vitality in the life of the Dominion. This is Canada's challenge to the world because the issues of world peace or war are wrapped up in the solution of exactly similar problems in the nations of Europe and across the Pacific.

The problem before the Fathers of Confederation was whether the existence of two races, two languages, two cultures in Canada was an insurmountable obstacle to the creation of a single united nation, and whether such a nation could exist on the basis of that fact. Their decision was that such a nation could exist, and they laid down the formula in the British North America Act. Confederation became an accomplished fact, and it has not only survived but progressed and grown to an amazing extent.

There is one Canadian of French race and language for every two Canadians of English race and language. How shall both feel that common love for home and soil which is the soul of nationality? Both races have traditions, a part of their own, on what principle and to what ends may both races have a common national future?

These vital questions cut clean through the whole of our national life today, just as they did prior to and at the time of Confederation. Shall the people of Canada, with so vast an estate to develop in common, with so great a part to play in elevating the quality of living, and so noble an opportunity awaiting them alike in the British Empire and in the sphere of international relations, always be faced with the menace of racial discord, of attacks by one race on the integrity of the other, of recourse to bitter discussion of rights that should be secure, or wrongs that should have been corrected, when scores of social and economic problems are crying out for solution? Race is like a car left with its engine running. The slightest touch will put it in gear and set it speeding towards more bitter accident.

In the nineteenth century Lord Durham's policy was the "obliteration" of the French-Canadian. The policy of the Fathers of Confederation was the recognition of the identity of both races, both languages, both religions, both cultures. Their ideal was one nation, two cultures; one nationality, two languages; one loyalty, two races.

Which policy was practical? To obliterate a whole people, or to form a nationality in which the identity of two peoples might be secure, free, developing? The Fathers of Confederation had the only practical policy, the only policy that would ensure peace, make the progress of Canada possible, and establish a new nationality in British North America.

Small Suns Compose Stars

Partially Eclipse Each Other Every Twenty-Four Hours

In Cauter's solar system there is a star of the ninth magnitude known as C. It is composed of two small suns, each about half as massive as our sun and but little more than half the diameter, though of much greater density. They appear to be dying down into the planetary stage, or burned-out condition, for they shine with a reddish light and possess a much lower surface temperature than our sun. This pair of twin worlds in the making are at an average distance apart of 1,700,000 miles, and they appear to revolve round one another at great speed in about twenty hours, partially eclipsing each other every time, as seen from the earth. We do not see the effect of these eclipses until forty-three years after they occur, owing to the great distance (2,730,000 times that of our sun) of this marvelous solar system of Cauter.

VITAMINS

Everyone needs them to support growth or to protect the body against germ-infection.

Wool By Aeroplane

Australian Company Considering This Means Of Transport

Transport of wool by aeroplane is being considered by Australian Air Services, Ltd., in districts where camel caravans are now employed. The company in Melbourne has already received a request from a station owner in Northern Victoria for specifications and an estimate of cost of freight plans to carry his wool over a difficult 500 miles of the journey to the nearest seaport. The transport of freight in the district in which the station is situated costs about £50 per ton, and a plane will be able to transport freight over the distance in a day whereas several weeks are often required.

Toes Made Comfortable Sore Corns Removed

Quick, safe relief is almost instantaneous if you apply PUTNAM'S CORN EXTRACTOR. Shoes won't pinch or hurt. One single drop of Putnam's stops the pain. A few applications make the corn dry up and drop off. Putnam's Corn Extractor gives satisfaction. They can use it every day. Get a bottle from your druggist. Refuse a substitute for PUTNAM'S, the one sure relief for sore corns.

Can See Two Oceans

The inhabitants of Costa Rica say that the only place commanding a view of the Atlantic and Pacific oceans is the summit of Mount Irazu situated in Cartago Province. The mountain is 12,600 feet high, and the Costa Ricans assert that on a clear day it is not difficult to see the waters of both oceans with the naked eye.

DO YOU SUFFER FROM RHEUMATISM

For Relief You Must Reach the Root Of The Trouble In the Blood

Sufferers from rheumatism who have found their condition unrelieved or actually growing worse while using other remedies, would do well to try Dr. Williams' Pink Pills. The tonic treatment with this medicine has proved in thousands of cases that it builds up the blood to a point that enables it to cast out the rheumatic poisons through the renal channels, the bowels, kidneys and the skin. When this is done rheumatism is banished and as long as the blood is kept pure and rich there will be no return of the trouble.

That Dr. Williams' Pink Pills do this is claimed for them is proved by the case of Mrs. Etta A. Munia, Springfield, Ohio, who says: "I was a helpless invalid for a year with inflammatory rheumatism. I had medical treatment and took mineral baths, but with no result. Naturally I felt utterly discouraged, and was suffering greatly. Then one day I read in a local paper of a case similar to mine, in which great praise was given to Dr. Williams' Pink Pills and I decided to give this medicine a trial. It took with the greatest pleasure I write to tell you that in less than two months after starting the use of Dr. Williams' Pink Pills I was able to get up and walk about, as well as ever I did. I can never praise these pills too highly and I hope that in making my experience public it may benefit some other sufferer."

A very useful book "Building Up the Blood" will be sent free on request by The Dr. Williams' Medicine Co., Brockville, Ont.

Dr. Williams' Pink Pills are sold by all druggists or will be sent by mail, post paid, on receipt of price, 50c. a box. Try them today.

Many western Canadians will make a tour of the Maritime Provinces in June, under the auspices of the "New Outlook," official publication of the United Church in Canada, and the Canadian National Railways.

Neighbor: "What is your son taking at college?"
Dad: "All we can send him."

COULD NOT WORK FOR MONTHS

Restored to Health by
Lydia E. Pinkham's
Vegetable Compound

Port Elgin, N. B.: "For three months, I was nervous and weak with tired feelings and could not do my work. A friend advised me to take Lydia E. Pinkham's Vegetable Compound and I have got good results from it and recommend it to others."—LILA TAYLOR, Port Elgin, N. B.

This dependable medicine is sold by druggists everywhere.

Sure Of Hoover's Support

League Of Nations Has Good Friend In U.S. President

What stand will President Hoover take in regard to United States co-operation with the League of Nations? Supporters of the League, while they have practically abandoned any hope that the States will become an active member of the League, feel that in Mr. Hoover they have the strongest support of its policies since the regime of President Wilson.

They base this belief on the fact that in 1919, President Hoover was an urgent advocate of United States entry into the League and that while bound by loyalty to his party to take an opposite point of view he will always remain at heart a strong proponent of League ideals.

It cannot be said that League supporters felt they had a genuine friend in Mr. Coolidge. Practical ignorance or tepid acquiescence was all that could be expected from the League's chief executive. Always he appeared to be dominated by the small town point of view of the narrowest type of American in his dealing with the League and constitutionally he seemed incapable of thinking on an international plane.

While the new president is also bound by party considerations, it is believed that by every means in his power he will strive to represent that sizable minority in his country who fervently advocate closer co-operation with the League in maintaining world security.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

Recipes For This Week

(By Betty Barclay)

BREAD PUDDING DESSERT

1 package lemon junket.

1 pint milk.

1 slice bread.

1 egg.

Raisins.

Remove crust from bread, butter lightly and cut in small cubes. Divide the cubed bread among dessert dishes and add a few seeded raisins. Warm the milk to lukewarm—not hot; add the lemon junket. Stir until dissolved; pour over bread. Let stand in a warm place until firm, then chill. Sprinkle with a mixture of sugar and cinnamon before serving.

SCALLOPED DISHES

Pour over layers of well-seasoned meat, fish or vegetable enough medium cream sauce to cover. Sprinkle well with buttered crumbs and bake until brown. When combined with starchy dishes—such as potatoes or macaroni, use thin cream sauce. Medium cream sauce calls for 1 cup milk, 2 tablespoons flour and 2 tablespoons butter. Thin cream sauce calls for 1 cup milk, 1 tablespoon flour and 1 tablespoon butter.

There is nothing repulsive in Miller's Worm Powders, and they are as pleasant to take as sugar, so that few children will refuse them. In some cases they cause vomiting through their action in an unclean stomach, but this is only a manifestation of their cleansing power, no indication that they are hurting. They can be thoroughly depended upon to clear worms from the system.

Big Job For Typemakers

Complete Set Of Chinese Type Will Take Seven Years To Produce
Few will envy a certain Shanghai printing establishment which has been working for three years to make a complete set of type, so that 10,000 Chinese characters (most of Chinese alphabet) can be printed. It will exceed by several thousands the number of characters now being used in the printing of the largest of Shanghai's Chinese newspapers.

Since the single symbol, in Chinese, may express a whole idea, an imposing array of type is required by the smallest printing establishment. The new alphabet, which will provide each of the 10,000 characters in five sizes, will be a boon.

Each "letter" must be photographed and the impression from the resulting plate tediously tooled by hand. Four more years will be required to complete the work.

Time For Everything

Have a time and place for everything, and do everything in its time and place, and you will not only accomplish more, but have more leisure than those who are always hurrying, as if vainly attempting to overtake time that has been lost.

Minard's Liniment for Coughs and Colds.

PROOF OF DYES is in the dyeing!

Words won't dye a dress, or coat, or sweater. It takes real dyes to do that. That's why Diamond Dyes contain from three to five times more aniline than any other dye—by actual test. It's the aniline in Diamond Dyes that do the work; that give the colors such brilliance; such depth and permanence. It's real aniline that keeps them from giving things that faded look; from spotting or streaking.

Next time you have dyeing to do, try Diamond Dyes. Then compare results. See how soft, bright, new-looking the colors are. Observe how they keep their brilliance. Your dealer will refund your money if you don't agree Diamond Dyes are better dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or tint silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

New Type Of Flying Craft

Being Built For British Air Ministry and Is Nearly Ready For Tests

The London Mail says that a flying machine called a "helicopter" is being built at the order of the British air ministry and is nearly ready for tests.

It is a development of the helicopter, and was invented by Vittorio Lascio, who in 1917 collaborated with Pescara in making five helicopters. The new machine is designed to ascend and descend vertically and to hover motionless in mid-air.

Traffic Is Increasing

Two New Steamers Ordered For Vancouver-Victoria Night Service

To meet increased freight and passenger traffic on the waters of the Pacific coast, two new vessels of the "Trinca" type for night service between Vancouver and Victoria have been ordered by the Canadian Pacific, it is announced by Captain C. D. Neroutos, manager of the British Columbia Coast Steamship service. The two sister ships are to be delivered next year, each having accommodation for 450 passengers.

Yours for the Asking

THESE bulletins and pamphlets were prepared and printed for your use. They contain a great deal of very valuable information worked out by the staff of scientists employed by the Dominion Department of Agriculture. If any or all of them would help you in your work, or in improving your home surroundings, you may secure copies without cost—simply by marking with an "X" the ones you would like, filling in the coupon below, and mailing this advertisement to us. No postage is required.

Bulletin No. 106

"Stem Rust in Western Canada"—practical methods of rust control—outstanding varieties.

Pamphlet No. 83

"The Combined Rasper-Thresher in Western Canada"—one of the most important experiences of present growers in Canada—varieties recommended for different sections.

Circular No. 62

"Mosquito Control in Canada"—tells how to treat the breeding places of these pests so they cannot multiply.

Bulletin No. 60

"Annual Flowers"—lists and descriptions of all the annuals that will grow in Canada—varieties recommended for different sections.

Pamphlet No. 83

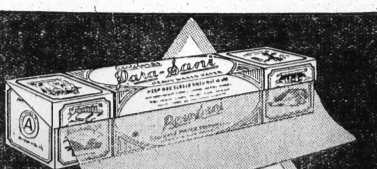

DEPARTMENT OF AGRICULTURE, OTTAWA

Please send me, free of charge, the bulletins (or pamphlets) which I have marked with an "X".

Strong Evidence That Indicates The Real Worth Of Dominion As a Field For Mineral Industry

Among the evidences of Canadian progress in 1928, none is more gratifying than that which again reveals, in stronger light than ever, the real worth of the Dominion as a field for mineral industry. The preliminary figures for the value of the country's mineral output, recently issued by the Dominion Bureau of Statistics, reach a peak well above any previous level.

There are two physical facts that carry a broad and special interest in connection with the steady ascent of Canada's mineral production in late years.

One is to be found in the sheer variety of minerals that enter into our annual output. In financial circles the wisdom of "diversity of investment" is a byword, and it may well be said that Canada's strength as a mining field likewise lies largely

in "diversity"—in the fundamental fact that Nature has invested the Dominion with mineral assets which, in variety, are matched by few, if any, countries. It is to this wide range of resources that the Canadian mining industry mainly owes both its enjoyment of present prosperity and its assurance of stable, well-sustained growth.

A second physical fact of no less importance exhibits itself in the breadth of territory afforded by the Dominion as fair ground for more intensive prospecting. A major portion of Canada has so far been subjected only to cursory study, but even so, ample information has been gained as to the potential mineral wealth of the less known regions of the country to confirm the Canadian mining industry in its title to an ample field for further development.

British Stock Farmer Uses Artificial Light

Ultra-Violet Rays Keep Animals In Good Condition

Ultra-violet light is reported to be a boon to the British stock farmer. Besides maintaining cows, racehorses, etc., in good health during the sunless months of winter, it is improving their condition so that they bring a higher price in the market, according to V. M. Weall, a south of England farmer, in Surrey, who experimented with pigs. Twelve pigs were treated with ultra-violet light for three minutes daily when they were 10 to 12 weeks old, and the time of treatment was gradually increased to 20 minutes. This was maintained until the animals were sold at the age of 20 weeks. Twelve similar pigs were kept as controls without light treatment. All 24 were sold on the same day, and in every case the irradiated pigs sold for a higher price than the untreated animals. The extra money obtained for each pig was said to be 14 times the cost of the operation of the quartz lamps which were used for the irradiation.

Healthy Herds In Dominions

Packing House Inspection Shows Cattle In Splendid Condition

In fifty-six packing plants during the past fiscal year, inspectors of the Dominion health of animals branch examined 1,150,000 cattle, 610,000 sheep, 2,600,000 swine and 208,000 poultry and passed upon their suitability for human consumption. All carcasses found seriously diseased were condemned as unfit for food, while others in which the disease was localized had the diseased portions condemned. It is a fine commentary on the excellent health of Canadian live stock and the efficacy of the Dominion regulations to maintain that health, that only a very small proportion of the carcasses examined were condemned—1.50 per cent. in the case of cattle, and 0.27 and 0.26 per cent. in the case of sheep, and swine. That the cattle percentage was even so high may largely be attributed to the fact that reactors from the tuberculosis eradication campaign were included in the inspection figures. There is to be no let up in the campaign against live stock disease, however, as the Hon. W. R. Motherwell has announced the opening of a new laboratory at Ottawa to be used for research work, particularly in new methods of eradicating bovine tuberculosis. Calmette vaccine, which it was announced would immunize calves against tuberculosis infection, has already been under test for five years at Ottawa, so far with somewhat negative results, but the experiments will be continued with the larger facilities now available until the claims of the discoverer of the vaccine are either proved or disproved. It is encouraging that the output of meat animals from the commercial herds of the country continue to show such a splendid percentage of healthy animals.

Great Britain Forging Ahead With No Sign Of Decadence As Some Critics Have Predicted

Keeping Pace With Settlement

Many New School Districts Organized In Province Of Alberta

Fifty-six new school districts were organized in the province of Alberta during 1928, bringing the total number of districts in the province up to 3,497. The total school enrolment is now approximately 160,000. Eighty-one new one-room schools and thirteen new two-room schools were built in country and village districts last year.

A feature of the report of the Department of Education is the reference to the increase in the number of students enrolled for technical education. In the Institute of Technology, at Calgary, enrolment last year reached a total of 1,745. Approximately 500 new students were enrolled during the year for correspondence courses. Over 1,000 more pupils wrote the departmental examinations than in any previous year. Of all the units written in the high school grades 75.19 per cent. were passed successfully.

Seeds Will Be Sun-Tested

Will Test Seeds For Purity At World's Grain Exhibition To Be Held In Regina

Grain exhibits entered in competition at the World's Grain Exhibition, to be held in Regina, in 1932, will be tested for purity in nature's laboratory. Although the exhibition itself will not open until August, the seeds entered in competition must reach the grounds before April, so that they may be sown in plots to determine the purity of the various varieties.

Prizes aggregating nearly a quarter million dollars will be awarded for grain and seeds, and exhibits from all the world's grain-growing countries are expected to be entered in competition.

B.C. Purebred Poultry Sent To Switzerland

Birds For First Shipment Supplied By Victoria Man

The first shipment of British Columbia purebred poultry ever sent to Switzerland, was made by the R.O.P. Poultry Breeders' Association of British Columbia recently. The shipment consisted of ten White Leghorn yearling hens, all blood-tested and with R.O.P. records of from 230 to 225 eggs. The birds were bred and supplied by N. E. Plaxton, Victoria. They were shipped on the steamer "Notre Dame" which took them to Havre, France. From there they went to Switzerland by train.

One Way Out

The way to avoid having unwanted guests for week-end visits is to have no spare bedrooms, according to a man who has given a great deal of thought to the uninvited-all-night-guest problem. "Extra bedrooms in a house invite company as surely as a peach tree in a yard invites boys," he said. "When you build a new house don't add too many bedrooms if you wish to lead a quiet life."

Electricity From Mud

Besides pies and baths, mud is to be used as a source of electricity. A power station has been erected at Karnap, Germany, which will utilize the mud from the Ems River. This mud has a heat value, when extracted and dried, which corresponds to that of lignite. The dried product will be used to heat steam for the engines driving the dynamos.

Phillip Whitwell Wilson, formerly a member of parliament for South St. Pancras, famous as an author and war correspondent, recently gave an address at the Town Hall, New York. He said:

All past empires have declined and fallen. Will that be the fate of the British Empire? No! With a population of forty-five millions she governs 450 millions. At the outset of the Great War her area was about thirteen million square miles. Today it is about a million more. We must remember that empires in the past lacked means of communication. Rome built admirable roads, but their value is trivial in comparison with our telegraphs, trans-oceanic telephones, quick trains, ships and airplanes. Our Empire is the first that recognized that when colonies grow up it is best for them to begin house-keeping for themselves. We have a civil service which is superb; our judiciary never stood higher in ability and dignity, testifying to the rising character of the people, the efficiency of our courts. In education there is a keener and more intelligent interest than in any other era of our history.

To the advancing prosperity of the British Empire the Great War came as a staggering blow. In 1914 our national debt was three-and-a-half billions sterling; it is now 38 billions. In 1914 our taxes were not quite one billion; they are now three-and-a-half billions. In England taxation is about \$80 per head annually, as against about \$30 in the United States. The latest annual report of her commerce shows England exporting four-and-a-half billions and importing six billions. The difference was in large part made up by income from foreign investments, receipts from shipping and insurance, with goodly amounts from tourists, most of them trans-Atlantic.

As to unemployment: about one-ninth the toilers in Great Britain are out of work. Usually the figure has stood at about one-twentieth. And yet, partly because of an increased population, there are at this hour more people at work in Great Britain than there were in 1914, and they are better clothed and fed. Since the war the number of British dwellings have been built, about 600,000 more are needed. Acute depression is felt in Wales and in Northern England, especially in the cotton and woollen trades, in iron, coal and shipbuilding industries. The textile mills before the war enjoyed wide markets in Russia, India and China. These have been lost. In coal mining the situation seems hopeless. In 1927 the estimated loss in this trade was \$45,000,000, in operating 3,000 mines by about 1,500 companies, liable for royalties to about 4,000 land-owners.

As to remedies: Every week about a thousand miners leave their old homes. Every year about five thousand miners are trained for other trades, and are slowly absorbed by other districts of England. Notwithstanding the depression in shipbuilding there are today on the stocks ships which will have a total tonnage of one-and-a-half millions. In the steel trade there is anxiety regarding the growth of competition with France, where the production may soon overtake that of Great Britain, now about eight million tons a year.

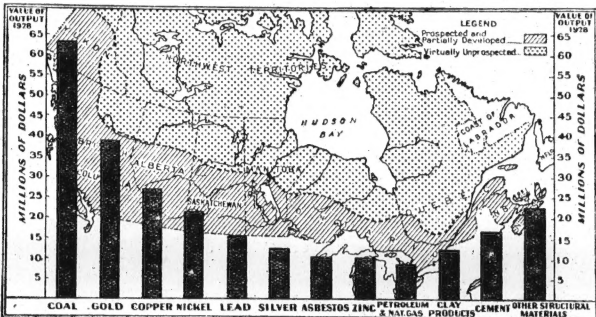

Often the question is asked, "Is England to share the fate of Holland and drop to secondary rank?" That would be no ignominious destiny. No nation on earth is more worthy of respect than Holland. A nation may be great without being the most populous or the richest.

Football Coach—What experience have you had?
Freshman—Well, last summer I was hit by two autos and a truck.

Great Britain provides a market for approximately 2,800,000,000 buttons a year.

Newrich "I use 10 brands of hair wash, I am manicured, pedicured, I get my scent straight from Paris. If this goes on, I shall be having a bath."—Dorthea, Berlin.

Origin Of Butter

Swaying Motion Of Camels Caused Sour Milk To Turn To Butter

The camel is the real inventor of butter, according to the results of research made by the National Dairy Council. The origin of this food was traced to the custom of the Arabs who carried across the desert on the backs of camels sour milk in skin bags. The swaying motion of the camels caused the contents of the bags to turn into butter, which the Arabs first used as a lotion for the skin. Later they made butter by tying the bags of milk to fast horses and racing the steeds up and down for several hours. Bags of milk were also laid on the ground and beaten until their contents were churned into butter.

China Bans Toy Pistols

Forbids Importation Because Bandits Use Them To Terrorize People

Because bandits in interior China use them to rob and terrorize the country folk who do not know that they are only toys, the Nationalist Government has issued a regulation forbidding the importation into China of toy pistols and air guns. "Such toys, while not regarded as harmful and are imported, only as playthings for children," explains the order, "are known to have been frequently used in the interior of China by bandits and gangs of riff-raff to terrorize the ignorant country folk. For this reason, hereafter, importation of toy pistols and air-guns, either by Chinese or foreign firms, will not be permitted."

Student—"And poor Harry was killed by a revolving crane."
Englishwoman—"My word! What fierce birds you have in America."

"Since I have been exercising my chest has expanded two centimetres a week."
"Then a year hence you will need a larger house"—Lustige Blätter, Berlin.

WINNIPEG NEWSPAPER UNION FASHIONS

No. 899—Graceful Lines. This style is designed in sizes 16, 18, 20 years, 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 2 1/2 yards of 40-inch material with 3/4 yard of 36-inch contrasting.

No. 127—Popular Coat Dress. This style is designed in sizes 16, 18, 20 years, 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material with 1/4 yard of 36-inch contrasting, and 1/2 yard of 18-inch material for separate vest.

No. 135—Smurly Simple. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material with 1 1/4 yards of binding.

No. 944—Entirely New! This style is designed in sizes 34, 36, 38, 40, 42 years, 36, 38, 40 and 44 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material with 2 1/4 yards of binding.

No. 948—Important School Frock. This style is designed in sizes 6, 8, 10, 12 and 14 years. Size 8 requires 2 yards of 40-inch material with 1/4 yard of 18-inch contrasting.

No. 846—Dainty Bolero. This style is designed in sizes 6, 8, 10 and 12 years. Size 8 requires 1 1/2 yards of 40-inch material and 1/4 yard of 18-inch contrasting, and 3/4 yards of ribbon.

All patterns 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

Wanted To See It

The recruit had been at the naval training station two weeks and had spent most of his time digging ditches, chopping trees, and filling depressions. Finally, he sought his immediate superior.
"You see, sir," he complained, "when I joined the navy they said I'd see the world, and for two weeks I've been doing nothing but re-arrange it."

Another Proof Of Intelligence

Charles Minick, a road patrolman, lay helpless in his bachelor home, near Cornwall, Wisconsin, suffering from a violent attack of rheumatism. Minick called his Airedale dog to the bedside, tied a message to the dog's collar, and repeated the name of a neighbor several times. The message was delivered by the animal, and Minick was taken to town and given medical care.

First Ten-Pounders

Trained farm workers who are headed for the West, where they will contribute to the success of the 1929 harvest. They came over on the "Melita," the first large group under the ten-pound rate, and were directed to farm work by representatives of the Canadian Pacific Railway.

Spring started March 21st.

Get ready now

A Late model 1927 Chevrolet Touring in good condition. Price \$500.00; \$200.00 cash, balance arranged.

1928 Chevrolet Coach, run only 1000 miles and has had excellent care. Price \$750.00; \$300.00 cash, balance arranged.

1927 Ford Sedan, four new tires, new radiator, runs very good. Price \$425.00; \$200 cash, balance arranged.

SPRING is already here! Soon you'll be feeling the lure of the road again. Your hands will be tingling to get on the wheel.

And here's your chance to save money on a Good Car . . . a car with thousands of miles of enjoyment left in, that somebody gave up to get an Outstanding Chevrolet.

We can't keep these Used Cars in stock with the spring deliveries coming in. They MUST go. They ARE going. BUT there are still many bargains left. Still a good variety to choose from. So come in and grasp this opportunity. Be ready for Spring this year!

A Word --- from the Publisher about Advertising

The products you see consistently advertised in this paper are worthy of your confidence.

It takes two things to make a consistent advertiser. One is a strong conviction that he has a product that will hold its place in public favor despite competition. The other is actual proof of that . . . the increasing popularity of his product.

If his product will not stand the test of comparison he would simply be throwing his advertising investment away. If the buying public rejects his product after it has been offered in advertising he HAS thrown his advertising investment away.

That's why the manufacturer who advertises his merchandise consistently is very sure of his quality . . . and why you may be sure of it, too.

Read the advertising here in your newspaper . . . it will guide you to the buying of worthy merchandise.

COD LIVER OIL AND ITS USES

By the Alex Taylor Hatchery, Winnipeg.

"It has been found that feeding 2 per cent of Cod Liver Oil in the Mash of the breeding birds during the winter months results in a five-fold increase in the anti-rachitic and fat A soluble vitamins.

When chicks are hatched from these eggs and absorb the rich yellow yolk into their intestines, they are fortified against rickets, as far as outward symptoms are concerned for the first three weeks.

It pays to give the baby chicks a rich inheritance from their mothers, in their first feed, the yolk. And then particularly if it is early in the season, go on and feed the chicks a little cod liver oil.

Here is what it does. When a chick is hatched, it has legs but no bone. The best you can call it is cartilage or gristle. Under natural conditions, the sunlight would pour down upon the chicks and the shorter rays, or violet light, would enable the chick to utilize the mineral matter in its feed in developing the gristle into bone.

Under present day artificial conditions of rearing, especially early in the season, when chicks are indoors, they can't get the benefit of the sun's direct rays. Feed them as much mineral matter as you will, and their bellies will grow, but their legs won't harden. They get "leg weakness" or rickets. Cod liver oil added to their ration, although it does not contain a bit of lime to make bone, contains the vitamins necessary to enable the body organism of the chick to utilize the food elements in the rest of its ration and build a bony frame work that is hard and sound to support the growth of the muscles and tissues.

Feed 2 per cent cod liver oil to your breeders this winter and then 1 per cent to your early chicks next spring, and you will have better chicks, lose fewer of them and do away with the old bug-a-bee of leg weakness.

A hen can produce up to her capacity only when she is fed so that all parts of the body are nourished. Egg production depends first on how the hen was reared. Large digestive and productive capacity are due to the chick having obtained the feed and care which makes most of its inheritance."

The cents in your pocket, says a careful observer, will purchase more than the dollars someone ones you.

The fool and his money, remarks a careful observer, are lucky to have got together in the first place.

A careful observer says that the difference between the stuff that people drink nowadays in the U. S. and what Rip Van Winkle drank is that Rip woke up.

"Are these fish fresh," asked a lady of a butcher. "Not enough to embarrass you at the table, madam," he replied.

A man is seldom as black as he is painted, or a woman as white as she is powdered.

Heard at the dance: "I don't see why they didn't get married. Both claimed it was a case of love at first sight." "Well, you see, they've had their eyes tested since."

"Do you ever take anything for your appetite," asked a doctor while giving a medical examination to a local citizen. "Sure, three meals a day," he replied.

ALL AUTO DRIVERS MUST BE LICENSED: FEE FIFTY CENTS

Under the provisions of the reprinted bill to amend the Vehicles and Highways Traffic act, now awaiting consideration in committee of the whole house, all drivers of autos must in future be in possession of drivers' licenses.

This license will be issued on payment of a fee of fifty cents, and will be in force for an indefinite period, unless suspended or cancelled for cause.

Referring to this clause, Hon. O. L. McPherson stated that it was not intended to issue drivers' licenses for life, as they may be revoked at any time for cause. Under ordinary circumstances, however, these licenses will be held until such time as the department may call them in for the purpose of bringing records up to date.

No person under 15 years of age shall be granted a license, and persons between the ages of 16 and 18 may be given licenses only on passing satisfactorily, an examination similar to that required in the case of a chauffeur under the act.

Provision is contained in the act for the granting of permits to residents outside the province to use a motor vehicle in the province for a period of, or for periods together amounting to, three in any one year, and shall not be required to take out a driver's license. It is necessary, however for such person to apply to the Alberta provincial police for a permit within seven days of his entering the province.

Taxis and livery cars, but not privately owned cars, will be required to carry compulsory insurance, under the provisions of the reprinted bill.

Under the first draft of the bill introduced into the legislature early in the session the much wider provision of compulsory insurance on all cars in the province was proposed.

Hon. O. L. McPherson, minister of public works, stated Tuesday morning that the government had not intended this, but rather to provide protection for the public by enforcing insurance for vehicles used in public livery.

Any owner of a livery failing to secure the proper amount of insurance as specified in the act will be subject to immediate cancellation of his license and will not be allowed to operate a car until the minister revokes the penalty.

TWENTY-ONE FEET

A motor car travelling at the rate of 35 miles an hour will cover 21 feet in two-fifths of a second. If a sudden demand is made on a motor driver, it takes him one-fifth of a second to apply his brakes and stop the car. But if the driver has had a drink of whiskey it affects his brain so that it takes him three-fifths of a second to apply the brakes. This means that the driver takes two-fifths of a second longer than he should, and the car travels 21 feet further than it would have done if the driver had not had the whiskey. Knowing how quickly motor cars travel, knowing too, that a distance of 21 feet may make all the difference between a fatal accident and no accident, you will see that spirit drinking is a very dangerous thing for a motor car to indulge in. The car driver should keep his brain clear, alert, always ready for emergencies. If you want your brain to always clear and alert, never touch intoxicating drink.

NEW APPOINTMENT

R. HENDERSON,

who has just been appointed Canadian National Railway's Industrial Agent for the Alberta district, with headquarters in the station at Edmonton. Expanding industries in the west, and eastern concerns which are looking to the opening of western branches, will be assisted by Mr. Henderson, who will do, for Alberta what Mr. Hoblin and Mr. Chambers, both recently appointed, are doing for the Saskatchewan and Manitoba districts. Mr. Henderson entered the services of the National system in 1912.

To Improve Maple Industry

Producers In Canada Will Ask Legislation From Government

An organization has been formed of Canadian producers and manufacturers of maple products which will submit to the Dominion Government a request for legislation to improve the condition of the industry. The chief demands will be for more stringent laws against adulteration, inspection to prevent adulteration, and a campaign of publicity to secure greater consumption of maple products in Canada.

The Royal Canadian Golf Association has decided to hold the Canadian Amateur Championships on the Jasper Park Lodge course this year, from August 19 to 24.

All patterns 25 cents. In stamps or coin (coin preferred). Wrap coin carefully.

Compiled "Roll Of Valor"

Official Records Of Heroism Valuable Addition To Regimental Histories

Victoria Crosses to the number of 1,157 and two "bars" have been issued since Queen Victoria instituted the decoration in 1856 at the end of the war in the Crimea. One hundred and twelve were awarded for the Crimea, 181 of the Mutiny, forty for the Zulu war, and six for the South African war. The award of the Cross for valor in Ashanti and other small wars brings the total distribution before the German war to 522. Since 1914, the total awards number 637. This figure includes two "bars."

Lieutenant Colonel R. Stewart, late Duke of Cornwall's Light Infantry, has compiled the Empire's "Roll of Valor." Arranged in order of regiments or corps the official records of heroism on land, in the air and on the sea form a valuable addition to the now large library of regimental histories and other military works.

Two officers of the Royal Army Medical Corps have the distinction of wearing a "bar" with the V.C. This is tantamount to winning the Cross a second time. Their names are Lieutenant A. Maitland-Lake and Captain N. G. Chavasse. There are two cases of father and son having each won the Victoria Cross. Field Marshal Lord Roberts and his son, who belonged to the King's Royal Rifle Corps, were each awarded the decoration. The two Congresses of the Rifle Brigade similarly distinguished themselves. The Lancashire Fusiliers won an ever fewer than seventeen V.C.'s in the late war.

Building Smallest 'Plane

German Experts Erect Machine Weighing Only 550 Pounds

What is believed to be the world's smallest airplane is now under construction at the Phoenix airplane works in Dusseldorf, Germany. It weighs only 550 pounds. It is fitted with a 34-horsepower Skion motor which gives it an average speed of 80 miles an hour, and it is able to carry two passengers and fuel for a five-hour flight. Its total radius is 40 miles. The plane is 25 feet in width, can be assembled or disassembled, and needs only the smallest barn for a hangar.

To Asthma Sufferers, Dr. J. D. Kellogg's Asthma is Remedy comes like a helping hand to a sinking swimmer. It gives new life and hope—something he can count on to help him. Its benefit is too evident to be questioned—it is its own argument—its own best advertisement. If you suffer from asthma get this tried remedy and find help like thousands of others.

Contention Is Right

Insurance or laundry receipts in Chinese will be illegal in New York State, if a bill recently introduced by Assemblyman Mark C. Kelly, of Utica, is passed. It provides that every laundry establishment, upon receiving clothing, shall issue a receipt in English, itemizing each article received. Said Assemblyman Kelly: "A Chinese laundry ticket does not mean a thing to the recipient if he is a one-language American."

A Corrector Of Pulmonary Troubles. Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience, and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

Cloves came from the Indies and take their name from the Latin clavis—meaning a nail, to which they have a resemblance.

The onion first came from India. The onion was almost an object of worship with the ancient Egyptians.

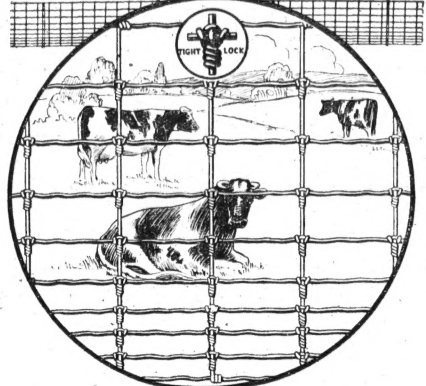

Could Not Sleep Heart Would Start Pumping and Pounding

Mrs. Fred. P. Averill, 135-12th Ave., Calgary, Alta., writes:—"I was bothered so much with my heart I could not sleep. I would waken up in the night gasping, and my heart would start pumping and pounding. A neighbor lady told me to try

When Cunarders Carried Cows

Vast Difference Between Past and Present Of Steamship Travel

Amazing facts are given by E. D. Breton, of London, England, who writes of the past and present of steamship travel, and refers to the famous old "Britannia," which was the first steamer to cross the Atlantic on schedule, and which was the product of the imagination of Sir Samuel Cunard, of Halifax, Nova Scotia, founder of the Cunard Line.

For instance, the Britannia, was the wonder ship of her day, yet described by the inimitable Charles Dickens as having a saloon "not unlike a gigantic harem," with sleeping berths comparable only to coffin. Her staff comprised two stewards, a cook, a kind of cabin boy and the navigation crew. She carried a cow abroad to supply fresh milk. Her bathroom would have disgusted any traveller of today, and may have distressed many prospects of those middle eighties.

Gone is the Britannia. Sir Samuel is gone too. Today the monuments to the man and his crude little steamers are the famous Cunarders which ply across the Atlantic to and from Great Britain, and Europe, and Canada, and the United States, and cruise into the seven seas of the world with their red funnels topped by a black band.

For instance: the world's fastest liner, the Cunarder "Mauretania," voyages along at about 30 miles per hour. The Cunarder "Berenaria" houses 4,000 souls, and carries hundreds of bathrooms, for passengers who can either pay the same old Britannia ticket price for accommodation undreamed of in those days, or pay as high as \$6,000 for luxury that kings could not get in days gone by. Passengers can now hold swimming parties in the ship's pool, stage balls, or send facetious messages by wireless to friends ashore. They tread on the Cunarder "Aquitania's" three miles of carpet, benefit by her 10,000 electric lights, and 1500 push bells, and are cheered by her 2,000 yards of silk damask wall coverings. Heedful travellers cross the Atlantic in about four days from New York on the Mauretania and marvel at her fame, which has lasted 22 years, and at her record of total mileage which runs into the million.

Sultan's Son a Fiddler

After looking in vain for a rich American girl to marry and restore his shattered fortune, Prince Abdul Kadir, the son of Sultan, Abdul Hamid, who today might be sultan of Turkey had not Mustafa Kemal made that country a republic, has sought permission from the minister of labor to join a gypsy orchestra as a violinist.

It is estimated that British workers spend \$150,000,000 yearly in travelling between home and place of employment.

The peach originally came from Persia.

Use Minard's Liniment for the Flu.

Will Maintain High

Quality Of Beef

Grade Must Be Satisfactory To Receive Government Brand

As soon as the necessary inspectors can be appointed at local points, the Federal Livestock Department will inaugurate a policy of branded beef, with the Federal Government responsible for the maintenance of high quality of the brands which it approves. In order to qualify under this scheme of Government certification, the beef must have been slaughtered in a Government-inspected abattoir, and bear the government inspector stamp. It shall then be submitted to the Government inspector and, if satisfactory grade, the brand of quality will be affixed to it. The beef must then be retailed through an establishment approved by the Government.

Reindeer For Canada

A cable from Stockholm states that a consignment of 300 live Swedish reindeer has been shipped to Canada through a Norwegian port. This is the largest shipment of the sort ever to go forward.

**What Will
you
do**

**When your
Children Cry
for It**

There is hardly a household that hasn't heard of Castoria! At least five million homes are never without it. If the children in your family, however, are almost daily need of its comfort. And any night you find your very thankful there's a bottle in the house. Just a few drops, and that colic or constipation is relieved; or diarrhoea checked. A vegetable product, a baby remedy for young folks. Castoria is about the only thing you have ever heard doctors advise giving to infants. Stronger medicines are dangerous to a tiny baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless, anxious night. It is always ready, always safe to use, in emergencies, or for everyday ailments. Any hour of the day or night that Baby comes fretful, or restless, Castoria was never more popular with mothers than it is today. Every drugist has it.

**Fletcher's
CASTORIA**

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. You learn—now—why this method is supreme.

Remember to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acidity. Each bottle contains full directions—any drugstore.

CHAPTER XVI.—Continued

Men hurried to do his bidding. When the stretcher bearers leaned to lift the inanimate body, Hoop-Is fiercely interfered. "Let him alone," he said savagely. Stopping, he picked up the light form and bore it down the hill to their bed in the rough log shack. Donald forced a few drops of brandy through the dying man's colorless lips. Blackie stirred feebly. His eyes flickered open and he smiled as he recognized Hoop-Is.

"Give me your hand," he whispered faintly. "I'm running my last high lead, old pal. I guess God'll be good to us rough-necks." He gasped painfully. The irregular breathing ceased; his eyes became fixed and glassy; his jaw sagged.

Hoop-Is sat motionless, the hand of his dead friend held in his warm clasp. Slowly his head dropped forward and his big frame shook with dry racking sobs. Doctor Paul came in hurriedly. In answer to the look of interrogation in Donald's eyes, he shook his head and shook his finger. Donald and Wilkinson tiptoed softly to the door. They were unshaken of the tears that made furrows down their blackened cheeks. Sick at heart, utterly overcome by this tragedy, Wilkinson sat dejectedly to a seat outside the cabin door and covered his face with his hands.

There came a sudden patter of raindrops that drummed on the roof of the cabin. Wilkinson stood erect with arms stretched wide. "Hain't," he cried. "The merciful rain! Thank Heaven!" He stood with face upturned for an interval, enjoying the pelting downpour, then turned to look in the cabin door, a deep and brooding sadness in his bloodshot eyes.

"Donald," he said gently, "the newspaper account of this fire will mention the fact that a logger was killed. A logger!—yes—men like Blackie are the backbone of this country, the salt of the earth. Will people ever learn?" he continued, in a voice vibrant with deep emotion. He pointed to the barkless skeletons of trees blackened and charred and branchless save for the gibbet-like limbs stuck out from the naked trunks. "Think of it! All this—the sniffling out of a valuable life—a verdant hillside changed to a charnel house of dead trees and blackened stumps on bare rocks—the loss of thousands of dollars worth of valuable timber—all this caused by the careless dropping of a light cigarette!"

CHAPTER XVII.

Donald's announcement that Labor Day would be celebrated at the Lake was received with good-natured approval by the men of the camp, who spoke of the coming event as the "dry" holiday. The rain, which had

brought such blessed relief to the hearts of the guardians of the forest, had cleansed the air of the last vestige of haze that had overhung the valley for the past month.

The morning of the holiday dawned auspiciously. The hot days of August had given place to the mellow sunshine of Indian summer. Through the crystal clear atmosphere the mountains seemed much nearer, standing out sharply against the blue sky. Near the top there had been a fresh fall of snow that had covered the bare ice of the glaciers like a white mantle. The brilliant rays of the September sun were reflected from this virgin covering with a brilliancy that was dazzling to the eye.

Janet arrived for the occasion, bringing with her a score of her friends. All through the previous day the trail from the north had brought strings of cayuses from the Indian Reserve, their dusky riders gaily bedecked in holiday attire. "Klahowyn, tiliikum!" they shouted, their coffee-colored faces lighting up, with a grin that betokened a glad day spirit. Their tents dotted the lake-shore, their camp fires glowing cheerfully throughout the night.

The sports committee had arranged a varied list of events. A rowing race between the two camps; a sack race, free for all; a basketball game between the whites and the Indians; a sailing race in which two "buckies" from each camp would participate; a hundred-yard dash; a log-rolling contest between a man of the State of Maine and a citizen of New Brunswick. But these were mere preliminaries to the real event of the day, the much advertised horse-race. The men from the other camps, arrayed in their "Sunday clothes" made their appearance early in the day.

Each camp brought its quota of sandwiches and cakes, but the brunt of the work fell on Andy and his assistants, who piled tier upon tier of sandwiches on the long tables under the willows by the lake-shore. The konomaw was in half-barrels at each end of the tables, with a "help yourself" sign attached.

Old klotchmen, with stoical, somber faces, etched deep with cross-hatching of wrinkles, walked through the throng laden with baskets they were trying to sell. "Mika, taka basket," quavered their aged voices as they held forth their wares.

About eleven o'clock Mr. Wainwright appeared alone. "Where's Connie?" asked Donald. "As you are aware, Mr. McLean, Connie is very shy. I could not induce her to accompany me."

"That will never do," said Donald quickly. "I am going after her."

"I am afraid that your trip will avail you nothing," smiled Wainwright in his absent-minded way.

Donald borrowed a cayuse and set off up the trail. He hitched the horse at the edge of the clearing and proceeded on foot down the path, his shoes making no sound on the soft dark earth. As he turned a clump of alders and came in view of the cabin he stopped short, arrested by a sight that evidently elicited his amused interest.

Connie stood outside the door before a small mirror hung on the rough log walls of the house. She was attempting to place her heavy hair in a knob at the top of her head. A page cut from a magazine was tacked to a log near the mirror. She studied the photograph carefully, then returned to the attack with renewed vigour. But she could not get it to suit her. She tried and tried, but the heavy shining coils would elude her slender fingers and fall in a golden cascade over her slight shoulders. Her efforts to reach a satisfactory result brought her to the verge of tears. She stamped her little foot impetuously. At last she got it arranged in a fair semblance to that of the envious actress. The effect was so startling that Donald fairly gasped. The child of the moment was transformed, as if by a fairy's wand, to a woman of wondrous grace and beauty.

Connie perked her head snailly, then half smiled to show her small, milk-white teeth; apparently she was pleased with the position she saw in the glass. From the clothes she took a flour sack that had been split open and washed to be used for drying dishes. Draping this from her waist line, she pinned it securely. Assuming a haughty pose, she walked past the mirror with a sinuous undulating movement. The little artist was so perfect in her mimicry that Donald's lips involuntarily formed the word "Janet." Twice she passed before the tiny mirror with a regal step, her head turning with its characteristic bird-like motion to catch the reflection.

Gradually the queenly pose slipped from her. She stopped abruptly, throwing out her arms with a forlorn gesture. Her golden head fell forward. Two big tears welled from her blue eyes and ran down the small freckled nose. Her small hands plucked convulsively at her faded blue overall. A sob like a stab pain shook her slender body. One arm came up slowly to cover her tear-wet face as she threw herself face forward on the grass. Her slender shoulders were shaking with such an agony of weeping that Donald's throat felt constricted and his eyes grew sudden dim.

Her spotted cayuse, grazing nearby, raised his head at the sound of Connie's hysterical sobbing and moved to the small figure of his mistress. With ears bent forward and a look of bewilderment in his soft eyes, he nudged her back with his velvet nose. The sobbing continued, but her brown hand came up to pat his head lovingly.

Donald tiptoed softly back to the trail. He stood for some time with his hand on the saddle, his head bowed in deep thought. "Poor little kid," he said gently, then whistling a lively tune, he slowly retraced his steps to the cabin. He entered the clearing just in time to see Connie as she disappeared in the timber across the field. He did not want her to know that he was aware of her flight, so he knocked loudly on the door and shouted her name. A raven croaked derisively from the top of a dead tree. The pony raised his head to eye him silently. Connie's pet deer came around the corner of the barn, a look of gentle questioning in her beautiful big eyes.

"Donald ran slowly back to camp. Connie's distress had touched his heart; her heart-breaking sobs were still ringing in his ears. "It is not that Wainwright does not love his daughter," mused Donald. "It must be that he is very poor."

"Don't see how I can help," his thoughts ran on. "I must suggest to a father that he buy clothes for his child."

Andy rang the lurch-bell, and there was a wild but good-natured scramble for the tables.

A long table had been arranged in the big dining-room for the officials and Janet's party to which Donald had invited Mr. Wainwright.

"Did you find Connie?" queried Wainwright.

"No," lied Donald. "I couldn't find her."

Janet's friends were having a merry time. There was laughter, jesting and gay repartee from all sides. Douglas was in his element, his quips and brilliant sallies keeping the diners in a continual uproar.

As Donald glanced around the big table at the laughing faces of the gay party, he tried to visualize Connie dressed as one of these fashionably-clad girls who represented Vancouver's "younger set." The vision he conjured caused him to smile dreamily.

Janet had manoeuvred to secure a seat beside Donald. In spite of all her artful contriving, she had been unable to have more than a few words with her father's busy general superintendent since her arrival. She noticed the friendly smile on his face and wondered what could be the cause.

PIMPLES CAUSED SEVERE ITCHING

On Face, Neck, Hands and Head. Cuticura Healed.

"My skin trouble started with pimples and red blotches that affected my face, neck, hands and head. The pimples were, hard, large and red, and festered and scaled over, causing disfigurement. They also caused severe itching and burning, and I could not sleep at night with the pain. The trouble lasted about two months."

"I tried several other remedies which did not give me any relief. I began using Cuticura Soap and Ointment and they helped me after a few applications, and in two weeks I was completely healed." (Signed) Miss Muriel Gibson, Huggett, Alberta.

Use Cuticura to clear your skin. Soap 25¢, Ointment 12¢ each box. Talcum 5¢. Full directions on each box. Write for booklet, "Pimples and Itching," to J. C. Ayer & Co., Lowell, Mass., U.S.A.

"You seem rather distraught," she said with an arch smile, her dark eyes fixed on his face. "Aren't you enjoying yourself?"

(To Be Continued.)

Infalible Finger Prints

System Used By Scotland Yard Has Been Greatly Improved

The use and importance of finger prints in the detection of crime is emphasized in a book published by Sir Edward Henry, former commissioner of the Metropolitan Police.

The number of identifications made during 1927 was more than 34 times greater than the largest number effected in a year by the old method. This depended on the unchanging measurements of parts of the human frame.

At Scotland Yard the ring finger of each hand is recorded and the slips are divided into 61 sub-groups. A search among 100,000 slips can be completed within five or six minutes, by a practised officer.

"He carries in his eye the salient features of the slip he is looking for and can search for it as rapidly as his hand is able to turn over the record slips."

Appointed To Railway Board

John A. Stoneman Will Succeed Hon. Frank Oliver

John A. Stoneman, Saskatoon, Sask., has been appointed as a member of the board of railway commissioners to succeed Hon. Frank Oliver, who recently retired.

Mr. Stoneman is a past president of the United Farmers of Canada and is at present a member of the Royal Grain Commission, appointed by the Saskatchewan Government to enquire into conditions affecting the grain trade.

It is understood that Mr. Stoneman will take over his new duties on the conclusion of the work of the grain commission.

Bristling With Thirteens

Superstitious People Should Avoid American Silver Quarter

Londoners have a deeply rooted idea that five shilling pieces are unlucky. It is very hard, says a writer in Pearson's Weekly, to find the origin of this queer idea, yet it is an absolute fact that many waiters and waitresses hate even to handle a five-shilling piece owing to their fixed belief that it will bring ill luck.

If it were the American silver quarter dollar, one could understand the superstition, continues the article, for surely, of all coins ever minted, this is the most risky. The quarter is twenty-five cents, which roughly corresponds to our shilling, and it simply teems with thirteens.

It has thirteen stars, thirteen letters in the scroll in the eagle's beak, thirteen parallel bars on the shield, thirteen horizontal stripes, thirteen leaves on the olive branch, thirteen arrow heads and thirteen letters in its name "quarter dollar"—an amazing collection of thirteens!

A PERFECT MEDICINE FOR LITTLE ONES

Baby's Own Tablets Should Be In Every Home Where There Are Children

The perfect medicine for little ones is found in Baby's Own Tablets. They are a gentle but thorough laxative, which regulate the bowels, sweeten the stomach, drive out constipation and indigestion; break up

and simple fever and promote healthy and refreshing sleep. It is impossible for Baby's Own Tablets to harm even the newborn babe as they are absolutely guaranteed free from opiates or any other injurious drugs. Concerning them Mrs. Earl Taylor, Owen Sound, Ont., writes:—"I have four children and have always used Baby's Own Tablets. I am never without the Tablets in the house as they are the best medicine that I know of for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Discover Old Observatory

Instruments, All Of Stone, Are In Excellent Condition

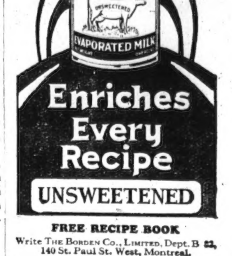

Workmen, digging a cellar in Buenos Aires, discovered an old observatory which archaeologists declare dates from 1181 B.C. A stone circle with markings showing observations on the sun's position throughout the year served as a chronicle.

The instruments, which are all of stone, were found in excellent condition, and a fair measure of solar altitude can be made even now. Several museums are bidding against one another for the possession of this old Nordic relic.

A telephonic service between Stockholm, Sweden and Buenos Aires, Argentina—a distance of 8,062 miles—has been inaugurated.

Little Helps For This Week

"Not my will but Thine be done."—Luke XXII, 42.

Whatever my Father wills is best. Dearly our suffering, toil or rest. Thine eye, and Thine alone, can see What I should have and do, and be. I only ask that I may know The way which Thou wouldst have me go.

That I may will in Thine may I lose. That I may Thine, Lord, for me shall choose. I, too, may choose.

—C. W. Harris.

There are no disappointments. It has been said, to those whose wills are bound up in the will of God.

—The Light of the Conscience.

The General Sherman Big Tree in the Sequoia National Park, California, estimated to be at least four thousand years old, is still producing an annual crop of cones from which fall millions of fertile seeds.

The first book to be written by a native Canadian was written by a woman and published in 1861. Since that time some 600 acts have been published books, many of them of world-wide renown.

W. K. Buckley, Limited, 167 Mutual St., Toronto.

BUCKLEY'S Mixture. 75c. and 40c.

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and children and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light and strong window panes, stable, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanatoriums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness weighs about 135 to 140 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.30 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100% Sunlight Send for booklet "WINDOLITE"

Guard Against FLU—Sore Throat The First Warning.

Few families will escape. This epidemic constitutes a real danger. Health authorities everywhere warn the public of the danger of the common cold "Flu" usually starts with Sore Throat. Unless the germs are killed by some antiseptic treatment a serious malady may develop.

A simple treatment is to gargle the throat three times daily with Nerville. The antiseptic properties of Nerville quickly destroy the germs in the throat. Of course if the chest is sore Nerville should be rubbed over the affected area. Lots of rubbing—it can't burn a blister, but will bring out the congestion and break up the cold.

To prevent "Flu" or colds from gaining headway Nerville will prove most effective. It is hardly necessary to point out that the bowels should be stimulated, and the system purged of all waste materials. For this purpose Dr. Hamilton's Pills are recommended. They act without griping or discomfort of any kind. This combination treatment of Nerville and Dr. Hamilton's Pills will prove a very satisfactory prevention for Grippe, Flu, etc.

QUALITY MERCHANDISE

Ginghams

The Butterick Summer Quarterly says of Gingham

"Gingham is immensely smart for frocks and suits with their short jackets and skirts of gingham over sleeveless white blouses.

Checks are an important fashion anyway and they are reflected in this vogue for Gingham."

Who would not be dressed smartly when our Gingham prices make it an economical pleasure.

Mrs. W. Masson returned after spending three weeks at Viking. Clarence and Violet Renwick left Monday to spend a week at Ryley and Three Hills.

Mrs. F. C. Wiese returned last Friday after spending a few days in the City.

Most of the rural school teachers are attending the Teachers Convention at Edmonton this week.

Mr. R. D. Smallwood has moved his family to the farm on Strawberry Plains for the summer.

Ladies Aid will meet with Mrs. Reeds on Thursday, April 11th. Every one welcome.

Mrs. H. W. and Miss Grace Love returned Tuesday after spending the holidays in the city.

The Albert School will be closed this week owing to the teacher, Miss Bessie H. Scott attending the Teachers Convention at Edmonton.

Mr. and Mrs. J. H. Elliott has moved in the house occupied by Mr. Smallwood until he gets a new house built.

Mr. Chas. King returned to Edmonton Monday evening after spending Easter with his brother Mr. W. H. King, of Irma.

Mrs. Jack Fletcher and son returned Tuesday after spending a week in Edmonton. Mr. Fletcher went to the City for the week end returning with Mrs. Fletcher and Jack Jr.

Mr. E. N. Reed who is farming the McDowell farm east of Irma started sowing wheat Thursday of last week but had to quit on account of the sudden drop in temperature. Most of the farmers are prepared to start seeding just as soon as the weather turns a little warmer.

Mrs. C. Cummings has returned from the hospital at Edmonton where she went to have the 22 bullet which lodged in her breast, removed. The operation was entirely successful and after a week's visit with Mrs. Jackson on Strawberry Plains she has returned to her home near Ross school.

Mr. and Mrs. Garfield Coulman were the principal guests at a shower and dance given in the Orbindale school on March 26th when a record crowd were in attendance. The bride and groom led the dancing to the strains of the lovers waltz. Dancing was enjoyed until midnight when Mr. Tom Slipper after a very appropriate speech called the bride and

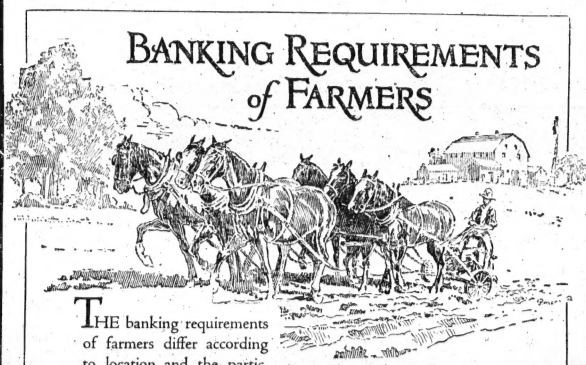

groom to the platform which was the signal for a miniature bride and groom to enter the school pulling an express wagon loaded with gifts. So numerous were the gifts that three trips had to be made and when they were displayed the platform looked like a department store. The feeling speech from the groom in which he thanked the audience for their kindness and good fellowship which they had shown towards his wife and himself. He extended an invitation to all to visit them at their home. The shower proceedings being ended dancing was resumed until the wee sma' hours.

The three wards in the Municipality of Battle River which voted on the herd by-law last Saturday all showed their preference for the herd law. While the vote cast was very small the result was decisive. The vote was as follows: Division 1 "Santee" 18 for and 7 against. Division 3 "Smallwood" 34 for and 5 against. Division 6, 31 for and 14 against.

If you have something valuable that you don't want and somebody else can use it, an ad. in this paper will sell it for you. Try it.

It was mooted at the annual meeting of the curling club that the ladies would not take part in the next bonspiel. No, we should not take chances of letting the ladies win that grand challenge again.

Modern wedding service before a Justice of the peace: "Well you love'n honor?" "Yep." "Lady, are you all set?" "Yep." "O. K. He's yours. Three bucks. If you need my services again I'll make a special discount to an old customer."

THE banking requirements of farmers differ according to location and the particular branch of farming in which they are engaged.

Whatever your banking requirements may be you will find the Bank of Montreal prepared to give the particular form of service you need.
